Class Pd. _____

Date: _____

Scientific Method Guided Notes

What are the 5 steps of the Scientific Method?

1. _____
2. _____
3. _____
4. _____
5. _____

Write the name of the correct step next to each description. Use your answers from above to answer these questions.

_____ During this step, based on things that we see around us, we make a prediction about what will happen during an experiment.

_____ Was your prediction supported or not supported? You will tell us during this step.

_____ Ideas are created during this step when we look at things around us.

_____ You will gather data while testing your predictions during this step.

_____ Creating a plan to check your prediction is the main focus of this step.
